

Gas & Diesel Fuel Improver

A dirty fuel system causes poor fuel economy, poor performance and increased maintenance costs. SWEPCO 503 Gas & Diesel Fuel Improver eliminates these problems by keeping fuel injectors, pumps and other close tolerance components clean. Special chemistry dissolves and removes harmful gum, varnish & carbon deposits in fuel systems and upper cylinder areas. It also protects expensive fuel injectors, pumps and o-rings from wear and deterioration caused by today's low-sulfur diesel fuel. Regular use keeps fuel systems in perfect operating condition. Especially recommended for all types of automobile & light truck fleets.

KEY FEATURES

- Recommended for all types of service . . . gas or diesel, 2 or 4-cycle engines, fuel injected or carbureted engines, heavy off-road equipment, long-haul highway fleets, stop & go city vehicles, stationary industrial engines, emergency power generators, passenger car fleets, motorcycles & high performance fuel injected automobiles
- Keeps fuel injectors and fuel delivery systems clean
- Improves engine performance & fuel economy
- Dissolves and removes gum, varnish & carbon deposits
- Clean burning, leaves absolutely no residue or deposits
- Lubricates upper cylinders, frees sticky valves
- Provides extra protection from wear & other problems caused by today's low-sulfur diesel fuels
- Protects fuel systems from rust & corrosion
- Easy – just add directly to individual or bulk fuel tanks
- Especially recommended for mixed diesel/gas fleets

Cleans fuel systems and improves fuel economy in any type of service . . .

Increase performance, minimize fuel system repairs and fuel consumption with SWEPCO 503 Gas & Diesel Fuel Improver

PERFORMANCE

DESCRIPTION & PURPOSE

SWEPCO 503 Gas & Diesel Fuel Improver is a unique blend of specialized high-temperature-resistant solvents and highly effective rust and corrosion inhibitors. The carefully balanced solvent portion of the formulation is extremely effective for removal of all forms of harmful engine deposits as well as for prevention of their formation. SWEPCO 503 is highly effective for removal of gum and other residues which tend to form in fuel injectors, fuel tanks, fuel filters and fuel lines, inhibiting proper fuel delivery and robbing power.

TESTED & PROVEN

A comparison of fuel filters from fuel systems run with untreated fuel (left) and fuel treated with SWEPCO 503 (right). SWEPCO 503 keeps sludge from accumulating to clog filters and other intricate fuel system components.

Fuel treated with SWEPCO 503 burns more cleanly. On the left is an injector spray pattern from a plugged injector running on untreated fuel. On the right is the spray pattern from an injector running on fuel treated with SWEPCO 503. Better atomization of fuel means more efficient combustion, more power and less smoke.

BENEFITS OF USE

Keeps fuel systems clean, increases fuel economy, improves performance and reduces maintenance costs.

Removes gum and carbon deposits in the intake manifold, valve seat and valve port areas which cause loss of compression, power and other engine problems.

Prevents formation of hard, crusty carbon deposits on combustion chamber surfaces and spark plug electrodes, which often increase the octane requirements of the engine.

Dissolves sludge deposits which form when corrosive acids come in contact with the engine oil.

Provides extra rust & corrosion protection.

Won't overheat, warp or burn exhaust valves.

RECOMMENDED FOR

All types of four and two cycle gasoline and diesel engines in all types of service . . . highway, city, off-road and stationary. Suitable for carbureted or injected engines. Also recommended for treatment of bulk storage fuel tanks. Especially recommended for fuel treatment in mixed fleets consisting of both gas and diesel engines. Also suitable for use in butane and propane fuel metering systems.

TREATMENT RECOMMENDATIONS

Add directly to empty fuel tanks before filling:

Gasoline – One part SWEPCO 503 to every 333 parts of gasoline.

Diesel – One part SWEPCO 503 to every 100 parts of diesel fuel. Can also be mixed 50%-50% for a diesel engine clean out shot.

PACKAGING

Available in 55-gallon (205 liter) drums, 6-gallon (23 liter) pails and cases of 24 twelve-ounce (355 ml) bottles.

A Product of SPX Technology™.

... the cutting edge performance SWEPCO Customers have come to expect.
